

Eyeliner Affercare

What you cannot do:

- ✗ Do not wet the eyeliner for the first 24 hours (avoid saunas, steam, and hot showers).
- ✗ Do not rub or touch your eyes, including not rubbing them with a towel after a shower.
- ✗ Do not use eye makeup (mascara, eyeshadow) for 12 days.
- ✗ Avoid direct sunlight and tanning beds for 10 days.
- ✗ Do not use exfoliating products on the eye area.

What you can do:

- ✓ You can start eyelash extensions after 2 weeks.
- ✓ Use a cold compress to reduce swelling or redness.
- ✓ If your eyes are temporarily dilated due to the numbing cream, do not rub your eyes and apply ice.
- ✓ If your eyes feel dry, you can use eye drops.

IMPORTANT:

- ✓ FOR BETTER RESULTS AND TO ENHANCE THE EFFECT, A TOUCH-UP IS RECOMMENDED AFTER 6-8 WEEKS.
- IF YOU EXPERIENCE ANY PERSISTENT SIDE EFFECTS, PLEASE CONTACT US.

LET ME KNOW IF YOU HAVE ANY QUESTIONS.

HEALING PROCESS FOR EYES AFTER PERMANENT MAKEUP:

1. Days 1-2:

The eyelids may be slightly swollen and red. The colour of the tattoo will appear brighter and more intense than the final result. You may experience tightness and dryness.

2. Days 3-5:

The peeling process begins. Small scabs may form on the eyelids. Do not rub or pick at them to avoid damaging the pigment and slowing the healing process.

3. Days 5-7:

The scabs start to fall off. The colour will lighten and may look uneven. This is a normal phase.

4. Weeks 2-4:

The colour continues to develop, becoming softer and more even. The eyelids will fully heal.

5. Weeks 6-8:

Complete healing of the eyelids. At this point, you can assess the final result and schedule a touch-up to refine the shape and colour intensity. Let me know if you have any questions.
